PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years specializing in cloud infrastructure automation, CI/CD pipelines, and security compliance. Reduced infrastructure costs by $4,000 monthly at Axis Bank while maintaining 99.9% uptime. Currently driving SOC2 compliance and GitOps transformation at WizCommerce. Expert in Kubernetes, Terraform, GCP, AWS, and DevSecOps.

TECHNICAL SKILLS

Cloud: AWS (EC2, EKS, S3, IAM, VPC, Route 53), GCP (GKE, Compute Engine, Cloud IAM, Cloud Armor, Cloud DNS, Cloud Monitoring, Cloud Storage)
Containers & Orchestration: Docker, Kubernetes, Helm, Cert Manager, Amazon EKS, Google GKE, Microservices
CI/CD: Jenkins, GitHub Actions, Argo CD, GitOps, CAB Approval Workflows
IaC & Config Management: Terraform, Helm, HashiCorp Vault
Monitoring: Prometheus, Grafana, Dynatrace, GCP Monitoring, APM
Security & IAM: DevSecOps, SSO/SAML, SonarQube, Trivy, OWASP, SOC2, Cloud Armor (WAF), Least Privilege IAM
OS & Scripting: Linux (Ubuntu, CentOS, RHEL), Bash, Python, YAML, JSON, Groovy
Version Control: Git, GitHub, Bitbucket
Methodologies: DevOps, GitOps, Agile, Scrum

WORK EXPERIENCE

DevOps Engineer — Apr 2026 – Present

WizCommerce – B2B E-Commerce SaaS Platform — *Gurugram, India*

- Architected and automated CI/CD pipelines using Jenkins and ArgoCD, enabling faster, reliable, and fully automated build, test, and deployment workflows.
- Implemented org-wide SSO (SAML/OAuth) across all internal applications, centralizing access control and achieving SOC2 compliance for the organisation.
- Designed and enforced GCP IAM policies based on least-privilege principles, minimizing security risk across cloud resources.
- Owned end-to-end deployment architecture, building Helm charts and CI/CD pipelines for new services from scratch.
- Deployed and managed GKE clusters for production workloads and OpenVPN infrastructure for secure remote access, ensuring high availability and reliability at scale.
- Implemented GCP Cloud Armor (WAF), strengthening application security against web-based threats, and integrated MCP and LLM-based models for AI-driven infrastructure troubleshooting with scoped read-only access.
- Automated SSL certificate lifecycle management using Google Managed Certificates and GoDaddy, and administered DNS across GoDaddy and Route 53, configuring Slack alerts for near-expiry certs to eliminate downtime.
- Built real-time monitoring dashboards using GCP Monitoring, Prometheus, and Grafana, and configured 24x7 uptime checks across all services with automated Slack alerting, improving observability and driving faster incident response.

DevOps Engineer — Aug 2023 – Mar 2026

Axis Bank – India's Third Largest Private Sector Bank — *Mumbai, India*

- Reduced infrastructure downtime by 30% through comprehensive monitoring using Dynatrace, Prometheus, and Grafana, improving SLA compliance for mission-critical banking applications.
- Engineered automated CI/CD pipelines with Jenkins and Argo CD for Dockerized microservices on Kubernetes, increasing deployment efficiency by 45% and reducing manual effort by 70%.
- Optimized AWS costs by $4,000/month (15%) through EC2 right-sizing, auto-scaling, and Reserved/Spot Instances while maintaining 99.9% uptime across 50+ production servers.
- Implemented DevSecOps controls (SonarQube, Trivy, IAM policies) achieving 100% compliance with banking standards and reducing security incidents by 30%.
- Integrated Dynatrace APM for real-time tracking of API latency and infrastructure health, reducing MTTR by 40%.

PROJECTS

Bare-Metal Kubernetes with Zero Trust Architecture | *Kubernetes, Calico, Tailscale, Cloudflare* — Jan 2025

- Built multi-node Kubernetes cluster on bare-metal with Calico CNI, Tailscale VPN encryption, and Cloudflare Tunnel for zero inbound ports and enterprise-grade Zero Trust security.
- Deployed Prometheus/Grafana monitoring with public dashboards; automated installation with shell scripts ensuring restart-safe, fail-proof operation.

MERN Stack AWS Automation | *Terraform, EKS, Jenkins, ArgoCD, Route 53* — Jan 2025

- Provisioned AWS infrastructure with Terraform enabling 50% faster provisioning; configured Kubernetes Ingress with ALB, Route 53, and ACM for secure HTTPS with automated certificate renewal.
- Automated deployment reducing setup time from days to under 2 hours and eliminating configuration drift across dev, staging, and production.

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional | Google Professional Cloud Architect

EDUCATION

Shri Ram Institute of Technology — Jabalpur, Madhya Pradesh
Bachelor of Technology in Computer Science Engineering | CGPA: 8.2/10 *(2019 – 2023)*
